

DANIEL VARTANIAN

I'm a Media Manager at **Talent** Advertising Agency (**Publicis Groupe**) and a Academic Collaborator at the University of São Paulo (**USP**). My work focuses on spatial analysis, **complex systems** modeling, and computational approaches to marketing, social, and public health challenges.

I develop open-source research software, primarily in **R**, **Python**, and **NetLogo**. My tools are used by researchers studying complex systems, **chronobiology**, food security, and climate change.

I'm also involved in building scientific communities and contributing to open-source science through **rOpenSci**.

EDUCATION

2025
|
2022

MSc, Complex Systems Modeling

University of São Paulo (**USP**)

📍 São Paulo, SP, Brazil

- Founded USP's **Agent-Based Modeling Study Group**.

2022
|
2016

BSc, Marketing

University of São Paulo (**USP**)

📍 São Paulo, SP, Brazil

WORK EXPERIENCE

Present
|
2026

Media Manager

Talent Advertising Agency

📍 São Paulo, SP, Brazil

- **Lead the creation** of Talent's **OOH** (out-of-home) media intelligence unit, developing data products that replace intuition-based decisions with a systematic approach to media planning.
- Develop geospatial analysis and models, including **Marketing Mix Models**, classification, and optimization, to special projects such as fiber and broadband coverage mapping for **Claro**, one of the largest telecom companies in Latin America.
- Build pipelines that turn client and OOH operator databases (**Eletromídia**, **JCDecaux**, **Kallas**, **NEOOH**) into a single source of truth for the whole planning process.
- Connect the agency with OOH tech and adtech vendors (**AllUnite**, **Taptap Digital**, **bebot Digital**, **Logan**) to evaluate integration and measurement capabilities for client campaigns.

2026
|
2025

Research Fellow

Center for Metropolitan Studies (USP)

📍 São Paulo, SP, Brazil

- Led geospatial modeling and large-scale data mining on the **FAPESP**-funded **AcessoSAN** project, investigating healthy food access in favelas and low-income urban communities across Brazil.
- Contributed to the development of the **GeoReDUS** project, an open platform of Brazilian intra-municipal and regional data for public policy planning and monitoring.
- Built pipelines to process and analyze millions of records from **SISVAN**, **Brazilian Revenue Service**, **DATASUS**, **IBGE Census**, and climate datasets like **WorldClim 2.1** and **Mapbiomas**.
- Developed and delivered **training in R programming** and other data related tools to approximately 20 researchers.

2025
|
2024

Research Fellow

Sustentarea (FSP-USP)

📍 São Paulo, SP, Brazil

- Led agent-based modeling on the **CNPq**-funded **Global Syndemic** project investigating climate change effects on child nutrition and health in Brazil.
- Developed **NetLogo** models simulating food production systems and nutritional outcomes in children under 5, using climate projections from **Global Climate Models** and **IBGE** data.
- Created the **logolink** R package to provide analytical infrastructure for **NetLogo** simulations.
- Produced **scientific papers**, **pipelines**, and technical reports related to research in public health and climate science.
- Worked with interdisciplinary teams of nutritionists, biologists, statisticians, and health professionals across multiple universities as a member of the **RESICLIMA Network**.

2024
|
2022

Graduate Research Fellow

University of São Paulo (USP)

📍 São Paulo, SP, Brazil

- Developed nested linear models investigating the relationship between human chronotype and latitude using Brazil's largest chronotype dataset (n=115,166).
- Created the **mctq** R package (published on **CRAN**, peer-reviewed by **rOpenSci**) for processing chronotype questionnaires.
- Built pipelines for statistical modeling and data processing.
- Completed **master's thesis** on chronotype and latitude relationships.

2022
|
2019

Assistant Research Fellow

University of São Paulo (USP)

📍 São Paulo, SP, Brazil

- Developed **actigraphy** monitoring protocols and analytical models for circadian rhythm assessment using non-parametric methods, cosinor analysis, periodograms, and actogram visualizations.
- Created the **actverse** R package providing tools for **actigraphy** data analysis.
- Co-authored the first **Brazilian Actigraphy Consensus** and delivered training workshops to 60+ researchers, including a launch workshop at the 18th Brazilian Sleep Congress.
- Contributed to **USP's** Sleep Genetics project investigating associations between **chronotype** and **clock genes** using **actigraphy** and genetic data from saliva samples across multi-centric cohorts in São Paulo and Baependi, Minas Gerais.
- Worked alongside interdisciplinary teams of doctors, biologists, psychologists, and health professionals across multiple research institutions.

2019
|
2016

Undergraduate Research Fellow

University of São Paulo (USP)

📍 São Paulo, SP, Brazil

- Provided statistical modeling and data analysis support for **circadian rhythm** and sleep research projects.
- Served as head of marketing and communications for **USP's** Interdisciplinary Sleep Research Group (**GIPSO**), securing media coverage in major Brazilian outlets like *Folha de São Paulo* and *TV Globo's Fantástico*.
- Co-developed sleep science courses through **EACH-USP's** summer program and the **Coursera** platform.

SELECTED SOFTWARE PROJECTS

2026	PMTilesBR Creator and Maintainer Geospatial tiled datasets for spatial visualization in Brazil.	📍 GitHub
2026	LogoActions Creator and Maintainer GitHub Actions for the NetLogo framework.	📍 GitHub
2025	logolink Creator and Maintainer R package providing a tidy interface between R and NetLogo. • Published on CRAN (4K+ downloads). • Currently under peer review by rOpenSci.	📍 CRAN
2025	LogoScope Creator and Maintainer VS Code extension providing syntax highlighting for NetLogo. • Published on Visual Studio Code Marketplace (780 downloads) and Open VSX (2.2K downloads).	📍 Visual Studio Code Marketplace
2025	LogoClim Creator and Maintainer NetLogo model developed to simulate and visualize climate conditions using data from WorldClim 2.1. • Published on CoMSES Net. • With an accompanying article published in JOSS.	📍 CoMSES Net
2024	brandr Creator and Maintainer R package for managing brand visual identity in data products using the brand.yml standard. • Published on CRAN (3K+ downloads).	📍 CRAN
2023	actverse Creator and Maintainer R package providing a tidy toolbox for actigraphy data analysis.	📍 GitHub
2021	mctq Creator and Maintainer R package providing a tidy toolbox for processing the Munich ChronoType Questionnaire (MCTQ). • Published on CRAN (15K+ downloads). • Peer reviewed by rOpenSci. • Cited in chronobiology research across multiple countries.	📍 CRAN

TEACHING EXPERIENCE

- 2026
|
2025
- **An Introduction to the R Programming Language**
University of São Paulo  São Paulo, SP, Brazil
 - Developed and delivered an introductory R programming course for researchers at the School of Public Health (**FSP**) (2025) and School of Philosophy, Literature and Human Sciences (**FFLCH**) (2026) at the University of São Paulo (**USP**).
 - Trained approximately 50 researchers across both institutions.
- 2024
- **Technical High School Program in Administration**
São Paulo State Government  São Paulo, SP, Brazil
 - Taught mathematics to approximately 100 students across two public high schools in São Paulo State's technical education program.
- 2023
- **ACH0042 - Problem Based Learning II**
University of São Paulo  São Paulo, SP, Brazil
 - Taught science and computational methods to 60 information systems students at **EACH-USP**.

HONORS, AWARDS & FELLOWSHIPS

- 2026
|
2025
- **Technical Training (Level IV) Research Fellowship**
São Paulo Research Foundation (**FAPESP**)
- 2025
|
2024
- **Technological and Industrial Development (DTI-B) Research Fellowship**
National Council for Scientific and Technological Development (**CNPq**)
- 2024
|
2022
- **Master's Research Fellowship**
Coordination for the Improvement of Higher Education Personnel (**CAPES**)

SELECTED OUTREACH PROJECTS

- Present
|
2026
- **Interdisciplinary Brazilian Symposium on Agent-Based Models (**SIMBRA**)**
University of São Paulo  São Paulo, SP, Brazil
 - Co-founded SIMBRA as an extension of USP's Agent-Based Modeling Study Group (founder) to provide a national platform for researchers and students across disciplines to discuss and disseminate agent-based modeling approaches.
- 2018
|
2017
- **Durma na EACH (Sleep at EACH)**
University of São Paulo  São Paulo, SP, Brazil
 - Created sleep and rest spaces for students at **EACH-USP** with plans for expansion to São Paulo public schools.
